Contents

75. Calcium/Calmodulin-Dependent Protein Kinase II 565
Mary B. Kennedy

76. Glycogen Synthase Kinase 3 569
Philip Cohen and Sheelagh Frame

77. The PIKK Family of Protein Kinases 575
Graeme C. M. Smith and Stephen P. Jackson

78. Histidine Kinases in Two-Component Signaling Pathways 581
Alla O. Kiselev and Ann H. West

79. The EF2K/MHCK/TRPM7 Family of Protein Kinases 587
Shari L. Wiseman, Fan-Yan Wei, and Angus M. Jackson

80. The Leucine-Rich Repeat Receptor Engineering Protein Kinases with Specificity for Unnatural Nucleotides and Inhibitors 609
Chao Zhang and Kevan William Pao and Nicolas Girard

81. Global Analysis of Phosphoregulatory Networks 645
Janine Mok and Michael Snyder

Section B – Protein Dephosphorylation 657
Nick Tonks

85. Phosphatase Families Dephosphorylating Serine and Threonine Residues in Proteins 659
Patricia T.W. Cohen

86. The Structure and Topology of Protein Serine/Threonine Phosphatases 677
David Barford

87. Naturally Occurring Inhibitors of Protein Serine/Threonine Phosphatases 683
Carol MacIntosh and Julie Dipplewicz

88. Protein Phosphatase 1 Binding Proteins 689
Anna A. DePauli-Roach

89. Protein Serine/Threonine Phosphatase Inhibitors and Human Disease 699
Shirish Shenolikar and Matthew H. Brush

90. Calcineurin 705
Claude B. Klee and Seun-Ah Yang

91. Protein Serine/Threonine-Phosphatase 2C (PP2C) 711
Hisashi Tatebe and Kazuhiro Shiozaki

92. Approaches to the Identification of Protein Tyrosine Phosphatase Substrates 717
Anton M. Bennett and Tony Tiganis

93. Inhibitors of Protein Tyrosine Phosphatases 727
Zhong-Yin Zhang

94. Regulating Receptor PTP Activity 737
Arunab Ghose and David Van Vactor

95. CD45 743
Michelle L. Hermiston, Vikas Gupta and Arthur Weiss

96. Cell-Cycle Functions and Regulation of Cdc14 Phosphatases 749
Harry Charbonneau

97. MAP Kinase Phosphatases 755
Stephen M. Keyse

98. SH2 Domain-Containing Protein-Tyrosine Phosphatases 771
Benjamin G. Noel, Gordon Chan, and Salim Dhanji

99. Insulin Receptor PTP: PTP1B 811
Soil G. Julien and Michel L. Tremblay

100. STYX/Dead Phosphatases 817
Matthew J. Wishart

101. Zebrafish and Phosphatase Families of Arabidopsis – a Paradigm for Plant LRR Receptors 601
John C. Walker and Kevin A. Lease

102. Calcium Signalling; Messengers, Transport Pathways, Sensors, and Physiological Outcomes 885
Martin D. Bootman and H. Llewelyn Roderick

103. The Structure and Topology of Protein Serine/Threonine Phosphatases 677
David Barford

104. STYX/Dead Phosphatases 817
Matthew J. Wishart

105. Zebrafish and Phosphatase Families of Arabidopsis – a Paradigm for Plant LRR Receptors 601
John C. Walker and Kevin A. Lease

106. Chronophin and Slingshot Cofilin Phosphatases 843
Alexandra C. Newton

107. Large Scale Structural Analysis of Protein Tyrosine Phosphatases 871
Alastair J. Barr and Stefan Knapp

108. Protein Phosphatases and Circadian Clocks 877
Yanshan Fang and Anima Sehgal

Section C – Calcium Signal Transduction 883
Martin D. Bootman

109. Calcium Signalling: Messengers, Transport Pathways, Sensors, and Physiological Outcomes 885
Martin D. Bootman and H. Llewelyn Roderick

110. Phospholipase C 887
Hong-Jun Liao and Graham Carpenter

111. Cyclic ADP-ribose and NAADP 893
Antony Galione and Grant C. Churchill

112. Voltage-Gated Calcium Channels 897
William A. Catterall

113. Store-Operated Calcium Channels 911
James W. Putney

114. Arachidonic Acid-Regulated Ca2+ Channel 915
Trevor J. Shuttleworth

115. IP3 Receptors 921
Colin W. Taylor and Zhao Ding

116. Ryanodine Receptors 927
David H. MacLennan and S. R. Wayne Chen

117. Intracellular Calcium Signaling 937
Dagmar Harzheim, H. Llewelyn Roderick and Martin D. Bootman

118. Calcium Pumps 943
Ernesto Carafoli, Laura Fedrizzi, Teota Domí, Francesca Di Leva and Marisa Brini

119. Sodium/Calcium Exchange 949
Mordceal P. Blaustein

120. Ca2+ Buffers 955
Beat Schwaller

121. Mitochondrion as Organizers of the Cellular Ca2+ Signaling Network 963
György Szabadkai and Michael K. Buchen

122. EF-Hand Proteins and Calcium Sensing: The Neuronal Calcium Sensor Proteins 973
Lee P. Haynes and Robert D. Burgoyne

123. Calmodulin-Mediated Signaling 979
Anthony R. Means

124. The Family of S100 Cell Signaling Proteins 983
Claus W. Heizmann and Günter Fritz
Contents

125. Annexins and Calcium Signaling 995
   Stephen E. Moss

126. Calpain 999
   Alan Wells and Ludovic Leloup

127. Calcium Signaling in Smooth Muscle 1009
   Susan Wyay

128. Calcium Signaling in Cardiac Muscle 1027
   K.M. Dibb, A.W. Trafford and D.A. Eiser

Section D - Lipid-Derived Second Messengers 1031
Lewis Cantley

129. Historical Overview: Protein Kinase C, Phorbol Ester and Lipid Mediators 1033
   Yasutomi Nishizuka and Ushio Kikkawa

130. Type I Phosphatidylinositol 4-Phosphate 5-Kinases (P14P5-kinases) 1037
   K.A. Hinchliffe and R.F. Irvine

131. Type II PIP4-kinases 1043
   Lucia Rameh

132. Phosphoinositide 3-Kinases 1050
   K. M. Dibb, K.A. Hinchliffe and R.F. Irvine

133. PTEN/MTM Phosphatidylinositol 3-Kinases 1054
   David A. Frauman

134. Phosphoinositide 3-Kinases and Actin Cytoskeletal Rearrangement 1141
   Paul A. Janmey, Robert Bucki and Helen L. Yin

135. Type II PIP4-kinases 1043
   Lucia Rameh

136. Phosphoinositides and Actin Cytoskeletal Rearrangement 1141
   Paul A. Janmey, Robert Bucki and Helen L. Yin

137. PX Domains 1103
   Christian D. Elson and Michael B. Yaffe

138. FYVE Domains in Membrane Trafficking and Cell Signaling 1111
   Christopher Stefan, Anjon Audhya and Scott D. Emr

139. Protein Kinase C: Relaying Signals from Lipid Hydrolysis to Protein Phosphorylation 1123
   Alexandra C. Newton

140. Modulation of Monomeric G Proteins by Phosphoinositides 1131
   Sonja Vermorel, Len Stephens and Phillip T. Hawkins

141. Phosphoinositides and Actin Cytoskeletal Rearrangement 1141
   Paul A. Janmey, Robert Bucki and Helen L. Yin

142. Phosphatidylinositol Transfer Proteins 1151
   Shamshad Cockcroft

143. Inositol Pentakisphosphate: A Signal Transduction Hub 1159
   Stephen B. Shears

144. Phospholipase D 1167
   Wenhua Su and Michael A. Frohman

145. Diacylglycerol Kinases 1177
   Matthew K. Topham and Steve M. Prescott

146. Phosphatidylinositol 4,5-Bisphosphate 1183
   Michael Maceyka and Sarah Spiegel

147. Lyosphosphatidic Acid and Phosphatidylinositol 1,4,5-Trisphosphate Activation of G-Protein-Coupled Receptors 1191
   Tetsuji Match and Jerald Chun

148. The Role of Ceramide in Cell Regulation 1201
   Leah J. Siskind, Thomas D. Mullen and Lina M. Oleid

149. Role of Phospholipase A2 Forms in Arachidonate Acid Mobilization and Eicosanoid Generation 1213
   Jesus Bahalide and Edward A. Dennis

150. Prostaglandin Mediators 1219
   Ener M. Smyth and Carrey A. FitzGerald

151. Leukotriene Mediators 1229
   Jesper Z. Haeggstrom and Anders Wetterholm

152. Lipoxins and Aspirin-Triggered 15-epi-Lipoxins: Pro-Resolving Mediators in Anti-Inflammation and Resolution 1235
   Charles N. Serhan

Section E – Protein Proximity Interactions 1243
John D. Scott

153. Protein Proximity Interactions 1245
   Matthew G. Gold and John D. Scott

154. Rapid Characterization of in vivo Phosphorylation Sites and the Protein Kinases and Phosphatases that Regulate them by Affinity Capture 1247
   Timothy A.J. Haystead

155. FRET Analysis of Signaling Events in Cells 1253
   Peter J. Veenere and Philippe J.H. Bastiaens

156. The Focal Adhesion: A Network of Interactions 1265
   Frank M. Mason and Scott H. Soderling

157. WASP and WAVE Family Protein Complexes 1271
   Mark B. Kennedy

158. Synaptic NMDA-Receptor Signaling Complex 1277
   Yann Hyvert and Jean-Luc Imler

159. Toll Family Receptors 1277
   Jackie D. Corbin

160. Signaling and the Immunological Synapse 1283
   Imanuele Giustino and Andrey S. Shaw

161. The Ubiquitin-Proteasome System 1293
   Mark Hochstrasser

162. Caspases: Cell Signaling by Proteolysis 1297
   Guy M. Salvesen

163. MAP Kinase in Yeast 1303
   Mapa Sahoo, Amjad Hussein, and Elaine A. Elias

164. Mammalian MAP Kinases 1315
   Norman J. Kennedy and Roger J. Davis

165. Subcellular Targeting of PKA through AKAPs: Conserved Anchoring and Unique Targeting Domains 1329
   Mathew D. Pink and Mark L. Dell’Acqua

166. AKAP Transduction Units: Context dependent Assembly of Signaling Complexes 1337
   John D. Scott and Lorene K. Langeberg

167. Dendritic Protein Phosphatase Complexes 1343
   Anthony J. Baumann and Roger J. Collman

168. Protein Phosphatase 2A 1353
   Adam M. Silverstein, Anthony J. Davis, Vincent A. Biedlinski, Edward D. Esplin, Nadir A. Mahmood and Marc C. Mumbly

169. 14-3-3 Proteins 1367
   Hubert Hondevrux

170. Protein Interaction Data Resources 1375
   Ian M. Donaldson

Section F – Cyclic Nucleotides 1387
Jackie D. Corbin

171. Adenylyl Cyclases 1389
   Adam J. Kuszak and Roger K. Sunahara
